

Environmental Policy

CT Production maintains a responsible approach to the environment. The company complies with relevant legislation and strives for continuous improvement to reduce costs and environmental impact.

Employees are committed to supporting this policy during daily operations by following good working practices:

- To assess all operations for minimised environmental impact.
- To eliminate, contain or minimise harmful materials and by-products.
- To minimise the production of waste and carefully manage disposal via selected registered carriers.
- To re-use materials where practical e.g. paper, and packaging.
- To recycle materials where practical, e.g. metal, plastic, cardboard and printed circuit offcuts.
- To use re-cycling routes which offer benefits for charity where possible.
- To use water and all forms of energy in an efficient manner, e.g. electricity, gas and vehicle fuel.

It is the responsibility of the Directors to ensure that the policy is relevant, up to date, communicated to and implemented by staff.

Mario Morilla
Managing Director
