

Quality Policy

At CT Production we are passionate about manufacturing and the services we provide.

We have state-of-the-art equipment to enable manufacture of products from PCB to boxed unit, prototype to volume, we continually strive to offer the best electronics manufacturing services in the UK.

We are committed to providing superior quality, service & delivery through continuous improvement and customer interaction.

Our services are approved to ISO9001:2015 & AS9100 standard with certification provided by Lloyds Register Quality Assurance (LRQA), along with independent audits for additional standards.

All processes are controlled, and performance monitored with meaningful KPI's to give us the most relevant feedback. Combined with our high level of supply chain communication and control, this is used to drive continual improvement.
